*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

***Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

Now "Trabzon," see No. 90283 in Supplement

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

, Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.
